## PROFESSIONAL EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                              |                                         |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------|
| <b>Ooredoo Head Office, Final-Year Internship — Master's</b><br>Designed and developed an intelligent employee turnover prediction platform integrating automated pipelines for data collection, model training, and machine learning model deployment.<br><i>Technologies: Python, Scikit-learn, Pandas, NLP, FastAPI, React.js, PostgreSQL, Docker, CI/CD</i>                                              | Feb 2026 – May 2026                     |
| <b>Innov Alliance Tech, Summer Internship — Front-End Developer</b><br>Designed and developed the user interface of an interactive analytics dashboard for real-time monitoring of R&D projects.<br>Contributed to the UI/UX design and development of a mobile application dedicated to locating electric vehicle charging stations.<br><i>Technologies: Angular, TypeScript, React Native, Expo, Figma</i> | Jun 2025 – Jul 2025<br>Tunis, Ben Arous |
| <b>Ooredoo Head Office, Final-Year Internship — Bachelor's</b><br>Co-designed and developed (in pairs) a mobile application for managing meeting room reservations, including an administrative dashboard.<br><i>Technologies: React, Redux, JavaScript, API REST, PostgreSQL, Redis, Docker, Figma</i>                                                                                                      | Feb 2024 – May 2024<br>Tunis, Tunisia   |
| <b>STAR Head Office, Advanced Internship</b><br>Participated in the design and development of client, expert, and administrator interfaces for a communication platform between experts and clients.<br><i>Technologies: HTML/CSS, JavaScript, Firebase</i>                                                                                                                                                  | Jul 2023<br>Tunis, Tunisia              |

## EDUCATION

|                                                                                                                                      |                                     |
|--------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------|
| <b>Master's Degree in Software Engineering, ISI Ariana, UVT</b><br>Specialization in Open Source Software Engineering                | 2024 – Present<br>Ariana, Tunisia   |
| <b>Bachelor's Degree in Computer Systems Engineering, ISTIC</b><br>Specializing in Embedded Systems and the Internet of Things (IoT) | 2021 – 2024<br>Borj Cedria, Tunisia |
| <b>Baccalaureate, Rafaha Mnihla High School</b><br>Experimental Sciences                                                             | 2021<br>Ariana, Tunisia             |

## ACADEMIC & PERSONAL PROJECTS

|                                                                                                                                                                                                                                               |          |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| <b>PastaQuest – DevOps Web Application</b><br>Web application for menu browsing and online reservations, deployed using a DevOps pipeline.<br><i>Technologies: React.js, Node.js, Express, MongoDB, CSS, Docker, Kubernetes, CI/CD, Azure</i> | Dec 2025 |
| <b>SmartDates IoT – Real-Time Classification System</b><br>Real-time classification of Deglet Nour dates using Transfer Learning and an IoT pipeline.<br><i>Technologies: Python, TensorFlow, YOLOv8, MQTT, Node.js, MongoDB, React.js</i>    | Dec 2025 |
| <b>Academic Management – JavaFX Application</b><br>Desktop application for managing teachers and class schedules.<br><i>Technologies: JavaFX, MySQL, CSS, FXML</i>                                                                            | Jan 2025 |
| <b>Personal Portfolio – Full-Stack Web Application</b><br>Personal website showcasing projects, skills, and experience.<br><i>Technologies: React.js, Node.js, Express.js, JavaScript, CSS, Docker</i>                                        | Dec 2024 |

## TECHNICAL & SOFT SKILLS

**Programming Languages:** Python, Java, JavaScript, C, C++  
**Web & Mobile Development:** React.js, React Native, Node.js, Angular, JavaFX, HTML/CSS  
**Databases:** MySQL, MongoDB, PostgreSQL, Firebase  
**DevOps & Tools:** Git, Docker, Kubernetes, CI/CD, Azure, VS Code, Android Studio, Figma, Canva  
**AI & Data Processing:** Machine Learning, Deep Learning, PySpark, Spark NLP, Transfer Learning, MLOps  
**Methods & Concepts:** UI/UX Design, UML, Scrum-Agile, CRISP-DM, ISTQB, Open Source Contribution  
**Soft Skills:** Communication, Teamwork, Autonomy, Creativity, Organizational Skills

## LANGUAGE SKILLS
